# PROBLEM STATEMENT

- Nowadays food business is very popular. But restaurants are not highlight because of less publicity and unplanned marketing.
- So restaurant owners face a huge amount of loss and some cases owners put an end to their business.
- On the other hand customers don't get enough idea about new restaurants and don't know where discount is more applicable.
- So problem is for both restaurant owners and customers.

**TIME FOR SOLUTION**

# SPRINT 1 DAY 10

The screenshot shows a Trello board for a project named "Discount Dining". The board is organized into five columns: "Product Backlog", "To Do", "Doing", "QA", and "Done". Each column contains task cards with details like due dates, progress indicators, and assignees.

**Product Backlog**

- Manager see all the transaction (Due: Apr 13, Progress: 3/3)
- Employee create discount code (Due: Mar 12, Progress: 1/1)
- Manager search employee by name (Due: Apr 20, Progress: 2/2)
- Manager search restaurant by name (Due: May 1, Progress: 2/2)
- Manager search employee by ID (Due: Apr 25, Progress: 2/2)

**To Do**

- Employee see all the transaction (Due: Mar 25, Progress: 2/2)
- Customer reset password (Due: Feb 26, Progress: 3/3)

**Doing**

- Employee search customer by name (Due: Mar 17, Progress: 4/4)
- Manager update employee data (Due: Apr 10, Progress: 0/0)

**QA**

- Employee update restaurant menu and price (Due: Mar 10, Progress: 2/2)
- Employee verify discount code (Due: Mar 14, Progress: 3/3)

**Done**

- Customer search restaurant by rating (Due: Feb 28, Progress: 2/2)
- Employee send verification code to the customer (Due: Mar 7, Progress: 2/2)
